

NxT:

THE EXCLUSIVE SOLAR BOLLARD

NxT: SMART SOLAR OUTDOOR LIGHTING

State-of-the-art solar electronics in an industrial grade construction power a customizable, elegant light: the NxT truly is a groundbreaking technological product. Powered by nothing more than sunlight, this stand-alone lamp offers a rainbow palette of lighting options that will ornament any garden, driveway or path with luminance. Every place, every light show, in every color.

 Advanced wireless connectivity

 High-capacity lithium battery

 Unique curved solar panel

 Full-color RGBW LED module

 C2C marine grade aluminium

 Special protective tape

Endless possibilities

The NxT offers bountiful lighting options. Light intensity, color and special effects can all be configured with a remote or smartphone. Seamless integration with Z-wave home automation systems, or even DMX, allows you to take your outdoor lighting to the next level. Group your lights any way you want. Imagine your garden lighting up when entering your driveway. Or if you'd rather keep it simple, don't bother flicking a switch at all and let the NxT

adapt to sunset & sunrise automatically by virtue of its built-in GPS tracker. A high-capacity lithium battery ensures that the NxT will last all night, even in dark winters. The modular design of the NxT allows you to customize your lighting to fit your style. Choose the color and finish you like, even change color later on by only replacing the aluminium. What's NxT?
